Component	SBO-BC-INT (Installations)		

Please find the original document at <https://launchpad.support.sap.com/#/notes/3063691>

Symptom

When you install the server tools with the installation package of SAP Business One running on Microsoft SQL, the components *System Landscape Directory (SLD)*, *License Service*, *Job Service*, *Workflow*, *DI Server* and *Service Manager* are 32 bits.

When you install the server tools with the installation package of SAP Business One, version for SAP HANA, the components *Workflow*, *DI Server* and *Service Manager* are 32 bits.

Solution

Scenario 1:

You are installing the server tools applications like *System Landscape Directory (SLD)*, *License Service*, *Job Service*, *Workflow* and *DI Server* from SAP Business One for MSSQL installation package via Setup Wizard.

Scenario 2:

You are installing the server tools applications like *Workflow* and *DI Server* from SAP Business One, version for SAP HANA installation package via Setup Wizard.

System behavior prior to SAP Business One 10.0 FP2111 release:

The applications are 32 bits. The installation folder *Packages.x64\Server Tools* exists.

System behavior after SAP Business One 10.0 FP2111 release:

The applications are 64 bits. The installation folder *Packages.x64\Server Tools* does not exist. The server tools components are installed from *Packages.x64\ComponentsWizard*.
